We work with a diverse spectrum of physical media including:

- Twisted pair
- Fiber
- Coax
- Category 5e, 6, 6e cable

Fiber optic cabling for building backbone including:

- Campus backbone
- Hub connectivity
- "Fiber to the desktop"

PROJECT MANAGEMENT

In addition to our project design and construction services, 5 Bars offers project management services. Our team will ensure that your project is completed successfully and meets all your objectives.

Our expertise and experience in the telecommunications industry will ensure that you gain the maximum cost efficiency while reducing the possibility of project delays. We provide strategic planning, maintain continuous communication, and manage resources, in addition to applying our industry-specific expertise.

Our industry experience includes completing engineering and construction of over 5,000 apartment complexes, and over 1 million apartment units nationwide. We have engineered, installed, and maintained thousands of wireless cell sites throughout the United States, including distributed antenna systems, small and micro cell systems, and dedicated point-to-point wireless networks.

We have installed fiber to the cell site, as part of the overall wireless infrastructure deployment, in support of AT&T and Verizon wireless. We have engineered, installed, and maintained thousands of wireless data systems (Wi-Fi) in both the public and private enterprise spaces.

INTERNET OF THINGS (IOT)

The 5 Bars team has vast experience installing Internet of Things devices in a variety of environments including commercial, municipalities, and residential applications. Our team will help you build the correct solution for any project that demands the needs of smart devices.

A SINGLE POINT OF CONTACT

With the highly qualified 5 Bars team, you can strengthen and diversify your supply chain with one contract and one point of contact with a commitment to honesty, integrity, and customer satisfaction. We consistently use small and diversified businesses as our partners to fulfill the mission and increase value for the customer.
